

HMS Destination

ETCI is proud to announce a new line of highly managed solutions:
HMS Destination.

These products, targeted toward customers whose systems are critical to their business, have been revamped and re-priced. Now it is even easier for you to take advantage of ETCI's scalable, available-anywhere application and disaster recovery environment.

The solution suite is comprised of four offerings:

- ▶ **Destination.Office**—A fully hosted secure environment available from any computer, anywhere. Destination.Office presents all your applications using XenApp and removes the requirement for on-site servers.
- ▶ **Destination.Backup**—Tapeless hosted backups over your existing Internet connection. Achieve peace of mind and regulatory compliance overnight. No more unreliable backup tapes!
- ▶ **Destination.DR**—A secure, scalable disaster recovery environment that mirrors your production environment to your own **Virtual Private Data Center (VPDC)**.
- ▶ **Destination.HA**—Highly managed hosting of your critical applications on ETCI's high-availability cluster.

Notes:

1. HMS Destination is co-located in Texas at our Tier-3 data center.
2. HMS Destination products work with the following operating systems:
Windows XP, 2000, 2003, 2008, Red Hat Linux, Netware, VMware, MAC OS X, IBM AIX, HP-UX, HP-Tru64 UNIX, IBM iSeries OS-400.
3. Destination.Office provides a common intranet portal (running on SharePoint) to all users for accessing their applications. Users require Internet Explorer to access applications. A maximum of two monitors (dual screens) are supported.
4. Destination.Backup has certain minimum bandwidth requirements. Call for details.
5. Destination.DR is available as cold-site, warm-site, and hot-site.
